SILVER ANNIVERSARY

The Silver Anniversary of the founding of the Computer-Based Honors Program was a huge success. Alumni traveled from as far away as California to celebrate the occasion on April 16 and 17, 1993.

The kickoff was the Grand Opening of the restored Old Observatory, Maxwell Hall, as the home of the Computer-Based Honors Program. Dr. Roger Sayers, President of the University of Alabama, cut the ribbon. Celebrants saw the magnificently restored dome, the luxurious hardwood floors, and New College's Conference Room in the East Annex. They admired the students' design of the computer laboratory and the re-creation of the original picket fence.

The CBH students hosted a Computer Fair in the afternoon where they demonstrated the results of their CBHP projects. The gala Anniversary Banquet on Friday night featured Dr. Sayers as guest speaker and a tribute to the outstanding project directors.

On Saturday morning, the first meeting was held of the Seebeck Society, the alumni association and support group for the Computer-Based Honors Program (See "Seebeck Society" story below). Following an Alumni luncheon at the Palmer Lake Pavilion, the celebrants learned of current CBHP activities, made suggestions for improvement, and shared memories of their CBHP experiences. The memories continued at the Alumni Banquet at the University Club.

SEEBECK SOCIETY

The first elected officers of the Seebeck Society for 1993-4 are:

John Baschab - President
Harry Pendergrass - Vice President and President Elect
Sally D. Miles - Secretary/Treasurer and Membership Chairman
Jackie Solomon Bell - Archivist and Newsletter Editor
Chris Jones - High School Relations Committee Chairman
Carl Seauquist - CBHP Speaker Committee Chairman

The following mission statement was adopted:

To provide support for the Computer-Based Honors Program students, Alumni and staff. To promote awareness of the Computer-Based Honors Program, and to be information technology ambassadors to our community and society.

(See Seebeck, p. 2)
A letter of appreciation was directed to be sent to the Board of Advisors who have provided direction to the CBHP in the years prior to the establishment of the alumni association.

Come meet the Class of 1998 during the selection process on campus March 7 & 8, 1994

Keep in touch with CBH...... subscribe to the CBH-LIST.

Here's how: Send E-mail to USTSERV@UAIVM.UA.EDU with the body of the message saying: "SUBSCRIBE CBH-L FirstName LastName" (LISTSERV ignores the subject line).

High School Relations by Chris Jones

Remember the impact CBH had on your life: the friendships you made, the knowledge that was opened up to you. What if you had never been informed that this program existed and never had the opportunity to apply. Do you feel as if you would have missed something?

We believe that there are excellent students out there who have never heard of CBH. They will miss out on the benefits it generates, and we will miss out on their insights. The Seebeck Society has begun a program to help correct this situation. We are looking for people (alumni, family) who will be willing to take 10-15 minutes to visit their local high school guidance counselors and inform them about the program. They in turn may be able to brief a deserving student.

Approximately after Labor Day, we will send a letter detailing some of the requirements and accomplishments of the CBH program. Volunteers will then make an appointment with their local high school(s)'s senior guidance counselor (or other appropriate person), deliver the information and explain the program, and maybe be available at a later date to answer a potential applicant's questions. Your minimal time investment may pay great dividends for a student and thus our nation down the road, just as it did for you.

If you are willing to participate, please check the box on the return form.

Some Research Projects 1993-4

- Effects of Economic Interdependence on the Likelihood of War 1948-86
- Perception of Bent Note Change in Musical Excerpts with Modulating Tempos
- Inverse Heat Transfer Program for Windows
- The Rally 'Round The Flag Effect: International Events and the President's Popularity Rating
- Simulation of Underwater Autonomous Vehicle Environment
- Network-Oriented Multi-User Game
- Computer Applications of the Commons Game
- Analyzing Patterns of Judicial Decision-Making Worth Analysis of the Variation of Statistical Parameters
