

## 2021 Goldwater Scholarships

Goldwater Scholarships are the most prestigious national undergraduate awards for students in the STEM areas. If you are a sophomore or junior majoring in the natural sciences, engineering, or mathematics; are actively involved in one or more productive undergraduate research projects; have a strong academic record (typically a 3.9 GPA or higher); and are planning on a career in research; then you should go to the Goldwater Foundation website (<https://goldwater.scholarsapply.org/>) and read about the program. If you think that you might be a good fit for this scholarship, you can fill out a short pre-application on that site. You will then be contacted by our campus representative for this program, Dr. C. Heath Turner, to set up a time to meet to discuss the application process. Pre-applications should be filled out by **October 21** at the latest. If you have questions regarding this program before you fill out the short pre-application, you can reach Dr. Turner at [hturner@eng.ua.edu](mailto:hturner@eng.ua.edu).
